

President's Message - April 2019

Variety is the Spice of Life

This past winter we experienced a variety of weather events we aren't used to here in Southern California. We had a lot of rain and cold and a few hailstorms to boot! To top it off we had intermittent warm days, fooling us into thinking spring had arrived early. Now with the ground saturated and days warming up, the landscape will likely be the prettiest in years. We're already hearing about the "super bloom" on our local hillsides and in the desert. In the nursery, roses and stone fruit trees are starting to blossom and it's a great time to get out in your garden and add some new plants.

If you crave variety, there's no better time to visit us at Evergreen Nursery. We have an amazing selection of roses and fruit trees this time of year. To start planning your rose garden, check out this newsletter's [2019 Rose Varieties](#) flip book. As always, you'll find amazing values at Evergreen – this is the place to find a Double Delight Hybrid Tea rose for just \$14.00!

We also have an incredible variety of stone fruit trees. We offer many types of apple trees, pear trees, peach trees, nectarine trees, plum trees, and apricot trees, including low-chill varieties. We also have several varieties of fig trees, pomegranate trees, cherry trees, berries, and grape vines. If you missed it last month, be sure to browse our flip book, [The Fruits of Our Labor](#), to choose your favorites.

If it's citrus you crave, we have over 40 varieties of citrus trees including grapefruit trees, lemon trees, lime trees, orange trees, plus a few specialty hybrids. If you want to break away from the usual grocery store offerings, try specialty varieties like the Cara Cara Pink Navel orange or the seedless Tango Mandarin.

The variety you love is waiting for you right here at Evergreen Nursery, all at grower direct prices! So come on in, bring the kids and the dog! We'll see you soon.
